

Business Letter Corpus (BLC) Keywords List

K Proper nouns, including names of companies, products, projects, buildings, towns, cities, countries; names of days and months, etc. non-standard acronyms and abbreviations., and non-text strings of alphanumerics are excluded from the list.

- 1) Keyness scores were obtained by comparing the entries of the BLC Comprehensive Wordlist with those of the combined Reference Corpus Wordlist. Note that a word whose frequency in the BLC is not either unusually high or low in comparison with what one would normally expect on the basis of the Reference Corpus does not get into the list. The verb type, *take*, for example, is not on the list because its normalized frequency in the BLC ($1827 \times 2.83 = 5170$) is not significantly different from its frequency in the Reference Corpus (= 5188). A word is considered to be "key" (either positively or negatively) if $p \leq 0.000001$.
- 2) N. Freq. = (Combined Ref. Corpus Word Tokens \div BLC Word Tokens) \times BLC Freq.

Keyness Rank	Entry Word	Business Letter Corpus (BLC)				Combined Ref. Corpus (Brown+LOB+TIME)		Keyness ¹⁾ Score	p
		BLC Freq.	%	N. Freq. ²⁾	%	Ref.C Freq.	%
