

Learner BLC Verb List 1 (Frequency Ranking with reference to the Ranking of the BLC Core Verb)

Total No. of Tokens = 210,404

Total No. of Common Verbs = 23,479

Total No. of Be, Have, Do = 10,454

Total No. of Verb Tokens (TVT) = 33,933

Total No. of Verb Types = 822

Verb Type-Token Ratio = 2.42 % (\approx 1:41)

1) All tokens that are assigned VB tags are listed. Spelling errors have been manually corrected

before counting. Entries include such verb-originated words as *pleased*, *concerning*, etc.

2) VBJP and VBDJN with the same graphic forms have been entered into the VBJP column.

3) Cum. Freq. = Cumulative Frequency

4) LNFQ = Lemmatized Normalized Frequency per 10,000 words

5) Cx = Differential Coefficient between Learner Corpus LNFQ and Native BLC LNFQ.

6) Corresponding Usage Ranks in the BLC Core Verb List.

7) χ^2 are given for items whose total observed frequencies are 10 or above.

Note. The list shows that the number of entries that can be recognized as legitimate verbs is 670. In addition to this, however, there are 152 words/types that are [wrongly] assigned VB tags for some reason. These words include such instances as *dechne*, *ober*, *quarafte*, *ulease*, and *leet* that do not really exist as English words (most of these instances are due to OCR recognition error). Also included in these tagging errors are such instances as *receit*, *derively*, and *remittance*. These instances (with obvious spelling errors) are assigned a VB tag simply because they filled the verb position in a sentence. All these instances, nevertheless, should have been replaced with a verb of some kind; therefore, it is considered appropriated to included these 152 instances in the total number of verb types of the Learner Corpus.
